The Electronic Engineer

1967 Annual editorial index

Issue Index

January

	Page
The panel revolution....A. Socolovsky	9
Chart of the electromagnetic spectrum....	16
EB recording to replace kinescope film?.... Smedley B. Ruth	27
New method for sealing semiconductors....	28
Will the B.Sc. be subprofessional.... Robert J. Bramlett	33
Graphical solution for 3-dB points..J. R. Martinez	48
Thermal regeneration in power-dissipating elements....C. Frank Wheatley	54
The electronic panel....Alberto Socolovsky	64
Semiconductor reliability: focus on the contacts.. Dr. J. A. Cunningham & J. G. Harper	74
Measurement techniques for cathode-ray tubes.... R. E. Hall	86
Reduce your assembly costs....Jack Renskers	97
Where will the electronic $ be in 1967.... Alberto Socolovsky	125

February

Power supplies: you get more than what you pay for....Alberto Socolovsky	13
El diode gives movies an expensive voice.... Smedley B. Ruth	23
Laser beam changes resistor values.... Stanley J. Lins & Richard D. Morrison	25
Helmet broadcasts EGG's of wearer....	26
Laser and light pipe trigger explosions....	26
Are we engineers really professionals?.... Gary Blake Jordan	31
Solve first-order networks with a desk calculator A. Moses	46
Power supply uses PDM-FM for regulation.... J. S. Reece	50
Calculate power supply filters the easy way.... Saul A. Ritterman	56
Specification sheet for systems power supplies....	60
Power supply user's survey....	61
Power supply spec sheet values....	62
Problems encountered when specifying power supplies....Robert M. Mayers	63
Problems in designing airborne power supplies.... Thaddeus Pertowski	66
From breadboard to production with building-blocks....Irv Brotman	72
New method results in "instant flexible circuitry".	74
Counting microwaves....	76
Dielectric isolation for MOS integrated circuits.... Alberto Socolovsky	114
An active resonator, procursor to active linear ICs Alberto Socolovsky	116

March

March: IEEE Show and business press month....	13
Are circuit papers passe?....A. Socolovsky	13
GaAs diode combines Gunn field effects.... Smedley B. Ruth	23
IEEE convention 1967....Merrill Jackson	20
The EE's job outlook for 1967..Robert J. Bramlett	30
What industry expects from the new graduate.... R. W. Pike	35
Basement computer....	36
R-F burst discharge from tuned circuits.... P. P. Beroza	50
Designing varactor multipliers....Anatol Zverev	56
Filters are necessary but don't overspecify.... H. Hiller	63
Design trade-offs for r-f transistor power amplifiers....Robert Minton	68
Optimized dc worst-casing of transistor switching circuits....	77
Optimized worst case design— Example 1: complementary inverter....	82
Optimized worst case design— Example 2: NOR-logic circuits....	85
Optimized worst case design— Example 3: transistor-diode logic circuits....	88
DVM with a memory....	92
Standards for improved calibration....	95
New tools help preserve connector reliability.... Bert Greenspan	104
Ferrites as r-f attenuators....Stanley M. Adelman	107
Speed/power chart for digital ICs....	148

April

More think to think....Alberto Socolovsky	15
IR method bonds flexible cables..Smedley B. Ruth	21
Superconducting element switches in less than 800 ps....Smedley B. Ruth	23
New bulk semiconductor: The LSA diode.... Smedley B. Ruth	24
Is metric in your future?....Smedley B. Ruth	31
Reliable decisions from unreliable measurements.. F. R. Van Wagner	50
New linear IC amplifier offers flexibility.... G. A. Estep	58
Junction FET revises UHF tuner..Joe Schurmann	63
Near-zone electric field-strength meter....	69
Selecting h-f linear dc amplifier.... J. Warren McCullough	73
Results of the survey of lab supply users....	79
Properties of ceramics for electronic applications.. Dr. Jay E. Comeforo	82
Additives reduce cooling system corrosion.... A. R. Kiefer & P. W. West	88
Understanding accelerometers....Dr. R. R. Bouche	90
What's new in test instruments..Smedley B. Ruth	96
Spectrum analyzing with a sweep generator....	102
LSI + CAD = ISSCC 1967....	140
The accuracy of test standards....	147

May

When somebody's life depends on our craftsmanship....Alberto Socolovsky	17
Ancient process yields smaller memory cores.... Smedley B. Ruth	25
The engineer mart of the future.... Robert G. Bramlett	30
Bode's return ratio: a powerful tool for feedback analysis....I. Stanley Rubin	52
Today's linear ferrites....Jan van der Poel	58
ICs help display lose weight and size.... A. M. Surkovich	66
Improving potentiometer life....Donald T. Heckel, John R. Jones and Richard S. Davidson, Jr.	71

Interconnection tradeoffs for monolithic ICs ..... W. H. Howe 74
Better skew measurement .....Robert A. Kleist 80
Memory systems comparison.....Konrad Weniger 118
Circuit modules: A report.....Smedley B. Ruth 122
IEEE convention notes .....Staff report 130

June

The LSI conferences.....Alberto Socolovsky 17
The shift from density to dollars..... Alberto Socolovsky 17
New idea in readouts: a multi-gun CRT..... 23
Does personality set earning power?..... Robert J. Bramlett 30
Practical equivalent circuits for electromagnetic devices.....B. C. Biega 52
Using linear ICs for consumer products..... R. L. Sanquini 58
The case for monolithic op amps..... Frank L. Ashford 66
The case for discrete op amps.....Jerald Graeme 67
Industrial applications of linear ICs..... Richard K. Dahlem 72
Test your own ICs.....Glen R. Madland 80
Gain-bandwidth chart on linear ICs..... Konrad Weniger 114
Digital logic IC speed/power chart..... 118
Electronic components conference HIC, LSI, but few discretes.....Staff report 126

July

The electrical-electronic interface..... Alberto Socolovsky 13
Miniature front end for microwave receiver..... Konrad Weniger 24
Create your own "idea lab".....David Shore 30
Charts for complex exponentials..... Donald W. Moffat, Sr. 44
Designer's guide to rotary switch construction.... L. Grabinger 48
Noise figure nomograph.....Gerald Beene 51
Measuring r-f power output.....Herbert H. Heller 52
The ellipsoidal reflector.....Norman Koch 56
Thin film resistors plated on circuit boards..... Harold J. Pawluk 62
Dual slope DVM.....Stephan K. Ammann 66
Terminating flat cable by welding....L. H. Schmid 70
Relay round-up .....Merrill Jackson 112

August

A year of EE for EEs .....Alberto Socolovsky 9
WESCON 1967 .....Hal Pawluk 13
Nuclear force provides improved guidance and inertial sensing .....Harold J. Pawluk 16
Instrumentation on wheels .....Konrad Weniger 24
Portrait of an engineering union John D. Kennedy 31
Complementary algebra .....Frederick M. Lewis 38
Controlling numeric display tube brightness and blanking .....James J. Klinikowski 44
A way to high speed switching .....Wei Wha Wu 49
Best quiescence for class A.....George P. Klein 55
Versatile channel tester for EDP systems ..... R. Serody 59
Multilayer circuit board connections ..... F. Z. Keister & G. A. Dreyer 64
How to design thick film hybrid ICs ..... William Hayes & Jon Van Hise 70
Resistor drift test .....Morton H. Burke 76
Low cost, Go/No-Go IC tester 82
Reference chart for lasers and detectors ..... D. Blattner & R. Wasserman 91

September

Technological perspective ....Alberto Socolovsky 11
Airborne system records-displays in real-time Smedley B. Ruth 16
A future in engineer-programming..Rob Bramlett 27
Understanding and using the dual-gate MOSFET R. Dawson, R. Ahrons & N. Ditrick 36
Solid state designs for phased arrays ..... G. R. Brainerd 42
Singularities in differential amplifiers ..... Keith O. Timothy 47
A programmed course on Field-Effect transistors.. Larry V. Hendricks 54
High-torque heat sink .....R. H. Deibler 67
Avoiding radiation effects on semiconductors .... David K. Myers 71

October

The fifth estate: You .....Alberto Socolovsky 7
New fuse to replace normal fuses? 14
The advanced degree—technical or management? Frank T. Gasper 21
FET levels Wien bridge oscillator output ..... Hal Pawluk 32
Nomogram estimates capacitor ripple current .... D. A. Arant 35
A wide-range VCO .....Joseph R. Giroux 39
Precautions for handling high speed digital pulses Bob Botos 44
Seven Rules for long-term RFI shielding ..... Mrs. Rebecca H. Sparling 49
Testers for digital ICs .....Konrad Weniger 54
Color-codes chart 58
Testing switch and lamp assemblies for RFI ..... Ben DiLucido & Emory Lloyd 62
Passive components for hybrids .....Hal Pawluk 67
Nomograph for a transistor switching circuit .... D. J. Grover 72
WESCON reprise 80

November

Are we on the threshold of evolution? ..... Alberto Socolovsky 7
Computer generates visual display ..... Konrad Weniger 16
Recurrents: a new method for ladder network synthesis .....James G. Holbrook 27
Electroless plating process products better circuit boards .....Konrad Weniger 32
Understanding microwave frequency synthesizers C. E. Barlow 36
Microwave antenna size-gain nomograph..... Dr. O. M. Salati 40
Designing a comb-line filter ..... Anatol Zverev & Kenneth Smith 44
Finding impedance mismatching losses ..... David P. Costa 52
Series gating increases current-mode logic power Warren Crews 56
How to monitor nanosecond interruptions in electrical contacts .....S. Alessio 62

December

Chiefs, Indians and electronic engineers ..... Alberto Socolovsky 7
World's largest computer storage device 12
Acoustic domains generate EL light 13
Improved etching technique 14
The patent situation: problems and solutions ..... Joan Segal 20
ASPEP on strike at RCA: an eyewitness report .. Joan Segal 24
Programming a desk size analog computer ..... Konrad Weniger 28
Inexpensive audio power amplifiers can be reliable Jack C. Sondermeyer 35
Color displays with a computer 42
Effective current in a gated rectifier ..... Lloyd G. Shore & M. R. Whitman 49
IC computers: a tool, not a totem ....Hal Pawluk 53
High performance sample and holds ..... M. Burd & D. Sear 60
Avoiding second breakdowns in power transistors Will Steffe & Tom Moutoux 65
The "basics" of lighted pushbuttons ..... Carl E. Martin 71

Subject Index

AMPLIFIERS Month & Page No.

Best quiescence for class A 8-55
Bode's return ration: a powerful tool for feedback analysis .....I. Stanley Rubin 5-52
Design trade-offs for r-f transistor power amplifiers .....Robert Minton 3-68
New linear IC amplifier offers flexibility ..... G. A. Estep 4-58
Noise figure nomograph .....Gerald Beene 7-51
Selecting h-f linear dc amplifier ..... J. Warren McCullough 4-73

Singularities in differential amplifiers ..... Keith O. Timothy 9-47
The case for discrete op amps ....Jerald Graeme 6-67
The case for monolithic op amps .Frank L. Ashford 6-66

CAREERS

A future in engineer-programming ..... Robert J. Bramlett 9-27
Are we engineers really professionals? ..... Gary Blake Jordan 2-31
ASPEP on strike at RCA: an eyewitness report.... Joan Segal 12-24
Chiefs, Indians and electronic engineers ..... Alberto Socolovsky 12-7
Create your own "Idea Lab" .....David Shore 7-30
Does personality set earning power? ..... Robert J. Bramlett 6-30
Is metric in your future? .....Smedley B. Ruth 4-31
Portrait of an engineering union .John D. Kennedy 8-31
The advanced degree—technical or management? Frank T. Gasper 10-21
The EE's job outlook for 1967 ..Robert J. Bramlett 3-30
The engineer mart of the future ..... Robert J. Bramlett 5-30
The fifth estate: You .....Alberto Socolovsky 10-7
The patent situation: problems and solutions .... Joan Segal 12-20
What industry expects from the new graduate.. R. W. Pike 3-35
Will the B.Sc. be subprofessional? ..... Robert J. Bramlett 1-33

CHARTS

Charts for complex exponentials ..... Donald W. Moffat, Sr. 7-44
Color-code chart 10-58
Digital logic IC speed/power chart 6-118
Finding impedance mismatching losses..... David P. Costa 11-52
Frequency-spectrum chart 1-16
Gain-bandwidth chart on linear ICs ..... Konrad Weniger 6-114
Memory systems comparison ....Konrad Weniger 5-118
Microwave antenna size-gain nomograph ..... Dr. O. M. Salati 11-40
Reference chart for lasers and detectors ..... D. Blattner & Wasserman 8-91
The accuracy of test standards 4-147

CIRCUITS

An active resonator, precursor to active linear ICs Alberto Socolovsky 2-116
Avoiding radiation effects on semiconductors ..... David K. Myers 9-71
A way to high speed switching .....Wei Wha Wu 8-49
A wide-range VCO .....Joseph R. Giroux..... 10-39
Best quiescence for class A .....George P. Klein 8-55
Bode's return ratio: a powerful tool for feedback analysis .....I. Stanley Rubin 5-52
Calculate power supply filters the easy way ..... Saul A. Ritterman 2-56
Controlling numeric display tube brightness and blanking .....James J. Klinikowski 8-44
Complementary algebra.....Frederick M. Lewis 8-38
Designing a comb-line filter ..... Anatol Zverev & Kenneth Smith 11-44
Designing varacator multipliers ....Anatol Zverev 3-56
Design trade-offs for r-f transistor power amplifiers ..... Robert Minton 3-68
Dual slope DVM .....Stephan K. Ammann 7-66
Effective current in a gated rectifier ..... Lloyd G. Shore & M. R. Whitman 12-49
FET levels Wien bridge oscillator output ..... Hal Pawluk 10-32
Filters are necessary, but don't overspecify ..... Herbert H. Heller 3-63
Finding impedance mismatching losses ..... David P. Costa 11-52
Graphical solution for 3-dB points ..J. R. Martinez 1-48
High performance sample and holds ..... M. Burd & B. Sear 12-60
How to design thick film hybrid ICs ..... William Hayes & Jon Van Hise 8-70
Industrial applications of linear ICs..... Richard . Dahlem 6-72
Inexpensive audio power amplifiers can be reliable .....Jack C. Sondermeyer 12-35
Junction FET revises UHF tuner ..Joe Schurmann 4-63
Miniature front end for microwave receiver ..... Konrad Weniger 7-24
Noise figure nomograph .....Gerald Beene 7-51
Nomograph for a transistor switching circuit ..... D. J. Grover 10-72
Optimized dc worst-casing of transistor switching circuits .....Chas. B. Slack 3-77
Optimized worst case design— Example 1: The complementary inverter 3-82
Optimized worst case design— Example 2: NOR-logic circuits 3-85
Optimized worst case design— Example 3: transistor-diode logic circuits 3-88
Power supply uses PDM-FM for regulation ..... J. S. Reece 2-50
Practical equivalent circuits for electromagnetic devices .....B. C. Biega 6-52
Precautions for handling high speed digital pulses Bob Botos 10-44
Problems encountered when specifying power supplies .....Robert M. Mayers 2-63
Recurrents: a new method for ladder network synthesis .....James G. Holbrook 11-27
R-F burst discharge from tuned circuits ..... P. P. Beroza 3-50
Selecting h-f linear dc amplifier ..... J. Warren McCullough 4-73
Series gating increases current-mode logic power Warren Crews 11-56
Singularities in differential amplifiers ..... Keith O. Timothy 9-47
Solve first-order networks with a desk calculator .....A. Moses 2-46
Understanding and using the dual-gate MOSFET R. Dawson, R. Ahrons & N. Ditrick 9-36

COMMUNICATIONS

Airborne system records-displays in real-time .. Smedley B. Ruth 9-16
Miniature front end for microwave receiver ..... Konrad Weniger 7-24
New linear IC amplifier offers flexibility ..... G. A. Estep 4-58

COMPONENTS

Ancient process yields smaller memory cores .... Smedley B. Ruth 5-25
Designer's guide to rotary switch construction ... Lawrence Grabinger 7-48
Electronic components conference: HIC, LSI, but few discretes .....Staff report 6-126
Ferrites as r-f attenuators ...Stanley M. Adelman 3-107
Improving potentiometer life ..... Donald T. Heckel, John R. Jones & Richard S. Davidson, Jr. 5-71
Laser beam changes resistor values ..... Stanley J. Lins & Dr. Richard D. Morrison 2-25
Measurement techniques for cathode-ray tubes... R. E. Hall 1-86
New fuse to replace normal fuses? 10-14
Nomograph estimates capacitor ripple current ... D. A. Arant 10-35
Passive components for hybrids .....Hal Pawluk 10-67
Reduce your assembly costs .....Jack Renskers 1-97
Relay round-up .....Merrill Jackson 7-112
Resistor-drift test .....Morton H. Burke 8-76
Testing switch and lamp assemblies for RFI 10-62
The "basics" of lighted pushbuttons ..... Carl E. Martin 12-71
Thermal regeneration in power-dissipating elements 1-54
Thin film resistors plated on circuit boards ..... Harold J. Pawluk 7-62
Today's linear ferrites .....Jan van der Poel 5-58
Understanding accelerometers ..Dr. R. R. Bouche 4-90
Where will the electronic $ be in 1967? ..... Alberto Socolovsky 1-125
The electronic panel.....Alberto Socolovsky 1-64

COMPUTERS

A future in engineer-programming ..... Robert G. Bramlett 9-27
A way to high speed switching .....Wei Wha Wu 8-49
Basement computer 3-36
Color displays with a computer 12-42
Computer generates visual display ..... Konrad Weniger 11-16
IC computers: a tool, not a totem.....Hal Pawluk 12-53
Precautions for handling high speed digital pulses Bob Botos 10-44

Programming a desk size analog computer ..... Konrad Weniger 12-28
Series gating increases current-mode logic power Warren Crews 11-56
World's largest computer storage device 12-12

CONFERENCES & CONVENTIONS

Electronic components conference HIC, LSI, but few discretes .....Staff report 6-126
IEEE convention 1967 .....Merrill Jackson 3-20
IEEE convention notes .....staff report 5-130
LSI = CAD = ISSCC 4-140
WESCON 1967 .....Hal Pawluk 8-13
WESCON reprise .....Hal Pawluk 10-80

CONNECTORS

From breadboard to production with building blocks .....Irv Brotman 2-72
New tools help preserve connector reliability 3-104

DESIGN

Avoiding radiation effects on semiconductors .... David M. Myers 9-71
A way to high speed switching ....Wei Wha Wu 8-49
Best quiescence for class A .....George P. Klein 8-55
Controlling numeric display tube brightness and blanking .....James J. Klinikowski 8-44
Counting microwaves 2-76
Designing varactor multipliers ....Anatol Zverev 3-56
Designer's guide to rotary switch construction .... Lawrence Grabinger 7-48
Designing a comb-line filter ..... Anatol Zverev & Kenneth Smith 11-44
Design trade-offs for r-f transistor power amplifiers .....Robert Minton 3-68
FET levels Wien bridge oscillator output ..... Hal Pawluk 10-32
Finding impedance mismatching losses ..... David P. Costa 11-52
Junction FET revises UHF tuner ..... Joe Schurmann 4-63
Microwave antenna size-gain nomograph ..... Dr. O. M. Salati 11-40
Miniature front end for microwave receiver ..... Konrad Weniger 7-24
Nomograph for a transistor switching circuit ..... D. J. Grover 10-72
Optimized worst case design, Example 1: complementary inverter 3-82
Optimized worst case design, Example 2: NOR logic circuits 3-85
Optimized worst case design, Example 3: Transistor-diode logic circuits 3-88
Precautions for handling high speed digital pulses Bob Botos 10-44
Series gating increases current-mode logic power Warren Crews 11-56
Solid state designs for phased arrays ..... G. R. Brainerd 9-42
Solve first-order network with a desk calculator .. A. Moses 2-46
The electronic panel .....Alberto Socolovsky 1-64
The ellipsoidal reflector .....Norman Koch 7-56

DISPLAYS

Airborne system records-displays in real-time ... Smedley B. Ruth 9-16
Computer generates visual display ..... Konrad Weniger 11-16
New idea in readouts: a multi-gun CRT 6-23

EQUIPMENT

Instrumentation on wheels .....Konrad Weniger 8-24
Problems in designing airborne power supplies ... Thaddeus Pertowski 2-66
Solve first-order networks with a desk calculator A. Moses 2-46
The accuracy of test standards 4-147
Versatile channel tester for EDP systems ..... R. Serody 8-59
Specification sheet for systems power supplies ... 2-60

FERRITES

Today's linear ferrites .....Jan van der Poel 5-58
Ferrites as r-f attenuators....Stanley M. Adelman 3-107
Ancient process yields smaller memory cores ..... Smedley B. Ruth 5-25

FILTERS

An active resonator, precursor to active linear ICs Alberto Socolovsky 2-116
Calculate power supply filters the easy way ..... Saul A. Ritterman 2-56
Designing a comb-line filter ..... Anatol Zverev & Kenneth Smith 11-44
Ferrites as r-f attenuators ...Stanley M. Adelman 3-107
Filters are necessary but don't overspecify ..... Herbert H. Heller 3-63
Graphical solution for 3-dB points ..J. R. Martinez 1-48
Recurrents: a new method for ladder network synthesis .....James G. Holbrook 11-27
Solve first-order networks with a desk calculator A. Moses 2-46

INSTRUMENTS & MEASUREMENTS

Airborne system record-displays in real-time .... Smedley B. Ruth 9-16
A wide-range VCO .....Joseph R. Giroux 10-39
Better skew measurement .....Robert A. Kleist 5-80
Counting microwaves 2-76
DVM with a memory 3-92
Dual-slope DVM 7-66
Helmet broadcasts EEG's of wearer 2-26
High performance sample and holds ..... M. Burd & B. Sear 12-60
How to monitor nanosecond interruptions in electrical contacts .....S. Alessio 11-62
Instrumentation on wheels .....Konrad Weniger 8-24
Is metric in your future? .....Smedley B. Ruth 4-31
Low cost, Go/No-Go IC tester 8-82
Measuring rf power output 7-52
Measurement techniques for cathode-ray tubes... R. E. Hall 1-86
Near-zone electric field strength meter..... 4-69
Noise figure nomograph .....Gerald Beene 7-51
Nuclear force provides improved guidance and inertial sensing .....Harold J. Pawluk 8-16
Precautions for handling high speed digital pulses Bob Botos 10-44
Reliable decisions from unreliable measurements F. R. Van Wagner 4-50
Resistor drift test .....Morton H. Burke 8-76
R-F burst discharge from tuned circuits ..... P. P. Beroza 3-50
Spectrum analyzing with a sweep generator 4-102
Standards for improved calibration 3-95
Testers for digital ICs .....Konrad Weniger 10-54
Testing switch and lamp assemblies for RFI ..... Ben DiLucido & Emory Lloyd 10-62
Test your own ICs .....Glen R. Madland 6-80
The accuracy of test standards 4-147
The electronic panel .....Alberto Socolovsky 1-64
Understanding accelerometers ..Dr. R. R. Bouche 4-90
Understanding microwave frequency synthesizers C. E. Barlow 11-36
Versatile channel tester for EDP systems ..... R. Serody 8-59
What's new in test instruments ..Smedley B. Ruth 4-96

INTEGRATED CIRCUITS

Avoiding radiation effects on semiconductors .... David K. Myers 9-71
Circuit modules: a report .....Smedley B. Ruth 5-122
Dielectric isolation for MOS integrated circuits ... Alberto Socolovsky 2-114
Digital logic IC speed/power chart 6-118
Gain-bandwidth chart on linear ICs..... Konrad Weniger 6-114
High performance sample and holds ..... M. Burd & B. Sear 12-60
How to design thick film hybrid ICs ..... William Hayes & Jon Van Hise 8-70
ICs help display lose weight and size ..... A. M. Surkovich 5-66
Industrial applications of linear ICs ..... Richard K. Dahlem 6-72
Interconnection tradeoffs for monolithic ICs ..... W. H. Howe 5-74
Laser beam changes resistor values ..... Stanley J. Lins & Dr. Richard D. Morrison 2-25
New linear IC amplifier offers flexibility..... G. A. Estep 4-58
Passive components for hybrids .....Hal Pawluk 10-67
Precautions for handling high speed digital pulses Bob Botos 10-44

XUM

Selecting h-f linear dc amplifiers ..... J. Warren McCullough 4-73
Semiconductor reliability: focus on the contacts .. Dr. J. A. Cunningham & J. G. Harper 1-74
Series gating increases current-mode logic power ..... Warren Crews 11-56
The case for monolithic op amps ..Jerald Graeme 6-66
Testers for digital ICs .....Konrad Weniger 10-54
Test your own ICs 6-80
Using linear ICs for consumer products ..... R. L. Sanquini 6-58

LASERS

Laser and light pipe trigger explosions 2-26
Laser beam changes resistor values ..... Stanley J. Lins & Dr. Richard D. Morrison 2-25
Reference chart for lasers and detectors ..... D. Blattner & R. Wasserman 8-91

MATERIALS

Ferrites as r-f attenuators ..Stanley M. Adelman 3-107
GaAs diode combines Gunn, field effects ..... Smedley B. Ruth 3-23
Properties of ceramics for electronic applications ..... Dr. Jay E. Comeforo 4-82
Superconducting element switches in less than 800 ps .....Smedley B. Ruth 4-23
Today's linear ferrites .....Jan van der Poel 5-58
Additives reduce cooling system corrosion ..... A. R. Kiefer & P. F. West 4-88
Ancient process yields smaller memory cores .... Smedley B. Ruth 5-25

MATH TOOLS

Bode's return ration: a powerful tool for feedback analysis .....I. Stanley Rubin 5-52
Charts for complex exponentials ..... Donald W. Moffat, Sr. 7-44
Complementary algebra.....Frederick M. Lewis 8-38
Graphical solution for 3-dB points ..J. R. Martinez 1-48
Practical equivalent circuits for electromagnetic devices .....B. C. Biega 6-52
Programming a desk size analog computer ..... Konrad Weniger 12-28
Recurrents: a new method for ladder network synthesis .....James G. Holbrook 11-27
Reliable decisions from unreliable measurements ..... F. R. Van Wagner 4-50
RF burst discharge from tuned circuits ..... P. P. Beroza 3-50
Solve first-order networks with a desk calculator ..... A. Moses 2-46

MEMORIES

Ancient process yields smaller memory cores .... Smedley B. Ruth 5-25
Memory systems comparison ....Konrad Weniger 5-118
Today's linear ferrites .....Jan van der Poel 5-58

MICROWAVES

Counting microwaves 2-76
Designing a comb-line filter ..... Anatol Zverev & Kenneth Smith 11-44
Designing varactor multipliers ....Anatol Zverev 3-56
Finding impedance mismatching losses ..... David P. Costa 11-52
Microwave antenna size gain nomograph ..... Dr. O. M. Salati 11-40
Miniature front end for microwave receiver ..... Konrad Weniger 7-24
Noise figure nomograph .....Gerald Beene 7-51

MISCELLANEOUS

Acoustic domains generate EL light 12-13
EB recording to replace kinescope film?..... Smedley B. Ruth 1-27
The ellipsoidal reflector .....Norman Koch 7-56
Laser and light pipe trigger explosions 2-26
Nuclear force provides improved guidance and inertial sensing .....Harold J. Pawluk 8-16
Reduce your assembly costs .....Jack Renskers 1-97
Specification sheet for systems power supplies ... 2-60
Superconducting element switches in less than 800 ps .....Smedley B. Ruth 4-23
Where will the electronic $ be in 1967? ..... Alberto Socolovsky 1-125

NETWORKS

Charts for complex exponentials ..... Donald W. Mofft, Sr. 7-44
Practical equivalent circuits for electromagnetic devices .....B. C. Biega 6-52
Complementary algebra .....Frederick M. Lewis 8-38
Recurrents: a new method for ladder network synthesis .....James G. Holbrook 11-27
Solve first-order networks with a desk calculator ..... A. Moses 2-46

OSCILLATORS

An active resonator, procursor to active linear ICs ..... Alberto Socolovsky 2-116
A wide-range VCO .....Joseph R. Giroux 10-39
FET levels Wien bridge oscillator output ..... Hal Pawluk 10-32
Junction FET revises UHF tuner ..Joe Schurmann 4-63
Miniature front end for microwave receiver ..... Konrad Weniger 7-24
New bulk semiconductor: The LSA diode ..... Smedley B. Ruth 4-24
R-F burst discharge from tuned circuits ..... P. P. Beronza 3-50

PACKAGING

Circuit modules: A report .....Smedley B. Rutth 5-122
Electroless plating process produces better circuit boards .....Konrad Weniger 11-32
Ferrites as r-f attenuators ..Stanley M. Adelman 3-107
From breadboard to production with building-blocks .....Irv Brotman 2-72
High-torque heat sink .....R. H. Deibler 9-67
ICs help display lose weight and size ..... A. M. Surkovich 5-66
Improved etching technique 12-14
IR methods bonds flexible cables..Smedley B. Ruth 4-21
Multilayer circuit board connections ..... F. Z. Keister & G. A. Dreyer 8-64
New method results in "instant flexible circuitry" 2-74
New tools help preserve connector reliability .... Bert Greenspan 3-104
Reduce your assembly costs 1-97
Terminating flat cable by welding ..L. H. Schmid 7-70
Testing switch and lamp assemblies for RFI ..... Ben DiLucido & Emory Lloyd 10-62
The electronic panel .....Alberto Socolovsky 1-64
The panel revolution 1-9
Thermal regeneration in power-dissipating elements 1-54
Thin film resistors plated on circuit boards ..... Harold J. Pawluk 7-62

POWER SUPPLIES

Calculate power supply filters the easy way..... Saul A. Ritterman 2-56
Power supplies: you get more than what you pay for .....Alberto Socolovsky 2-13
Power supply spec sheet values 2-62
Power supply users' survey 2-61
Power supply uses PDM-FM for regulation ..... J. S. Reece 2-50
Problems encountered when specifying power supplies .....Robert M. Mayers 2-63
Problems in designing airborne power supplies ... Thaddeus Pertowski 2-66
Results of the survey of lab supply users 4-79
Specification sheet for system power supplies 2-60

RFI

Ferrites as r-f attenuators ..Stanley M. Adelman 3-107
Near-zone electric field-strength meter 4-69
Seven rules for long-term RFI shielding ..... Mrs. Rebecca H. Sparling 10-49
Testing switch and lamp assemblies for RFI ..... Ben DiLucido & Emory Lloyd 10-62

SEMICONDUCTORS

An active resonator, precursor to active linear ICs ..... Alberto Socolovsky 2-116
A programmed course on field-effect transistors .. Larry V. Hendricks 9-54
Avoiding second breakdowns in power transistors ..... Will Steffe & Tom Moutoux 12-65
A way to high speed switching.....Wei Wha Wu 8-49
Best quiescence for class A .....George P. Klein 8-55
Design trade-offs for r-f transistor power amplifiers .....Robert Minton 3-68
Designing varacator multipliers.....Anatol Zverev 3-56
Digital logic IC speed/power chart 6-118
El diode gives movies an expensive voice ..... Smedley B. Ruth 2-23
Electronic components conference HIC, LSI, but few discretes .....Staff report 6-126
FET levels Wien bridge oscillator output..... Hal Pawluk 10-32
GaAs diode combines Gunn, field effects ..... Smedley B. Ruth 3-23

Gain-bandwidth chart on linear ICs ..... Konrad Weniger 6-114
How to design thick film hybrid ICs ..... William Hayes & Jon Van Hise 8-70
ICs help display lose weight and size ..... A. M. Surkovich 5-66
Industrial applications of linear ICs ..... Richard K. Dahlem 6-72
Interconnection tradeoffs for monolithic ICs .... W. H. Howe 5-74
Junction FET revises UHF tuner ..Joe Schurmann 4-63
LSI + CAD = ISSCC 1967 4-140
Miniature front end for microwave receiver ..... Konrad Weniger 7-24
New linear IC amplifier offers flexibility ..... G. A. Estep 4-58
Nomograph for a transistor switching circuit .... D. J. Grover 10-72
Optimized dc worst-casing of transistor switching circuits 3-77
Optimized worst case design—
Example 1: The complementary inverter..... 3-82
Optimized worst case design—
Example 2: NOR-logic circuits 3-85
Optimized worst case design—
Example 3: Transistor-diode logic circuits 3-88
Passive components for hybrids .....Hal Pawluk 10-67
Selecting h-f linear dc amplifier ..... J. Warren McCullough 4-73
Series gating increases current-mode logic power Warren Crews 11-56
Solid state designs for phased arrays ..... G. R. Brainerd 9-42
Speed/power chart for digital ICs 3-148
Testers for digital ICs .....Konrad Weniger 10-54
The case for discrete op amps ....Jerald Graeme 6-67
The case for monolithic op amps ..... Frank L. Ashford 6-66
WESCON reprise 10-80
The LSI conferences .....Alberto Socolovsky 6-17
Understanding and using the dual-gate MOSFET R. Dawson, R. Ahrons & N. Ditrick 9-36
The shift from density to dollars ..... Alberto Socolovsky 6-17
Avoiding radiation effects on semiconductors .... David K. Meyers 9-71
Acoustic domains generate EL light 12-13
A programmed course on Field-Effect transistors Larry V. Hendricks 9-54
High-torque heat sink .....R. H. Deibler 9-67
Semiconductor reliability: focus on the contracts Dr. J. A. Cunningham & J. G. Harper 1-74
New method for sealing semiconductors 1-28
New bulk semiconductors: The LSA diode ..... Smedley B. Ruth 4-24

SYSTEMS

DVM with a memory 3-92
Versatile channel tester for EDP systems ..... R. Serody 8-59
Graphical solution for 3-dB points ..J. R. Martinez 1-48
How to monitor nanosecond interruptions in electrical contacts .....S. Alessio 11-62
Low cost, Go/No-Go tester 8-82
Measurement techniques for cathode-ray tubes .. R. E. Hall 1-86

TRANSDUCERS

Nuclear force provides improved guidance and inertial sensing .....Harold J. Pawluk 8-16
Understanding Accelerometers ..Dr. R. R. Bouche 4-90

TRANSISTORS

A programmed course on Field-Effect transistors Larry V. Hendricks 9-54
A way to high speed switching .... Wei Wha Wu 8-49
Best quiescence for class A .....George P. Klein 8-55
Design trade-offs for r-f transistor power amplifiers .....Robert Minton 3-68
FET levels Wien bridge oscillator output ..... Hal Pawluk 10-32
Junction FET revises UHF tuner ..Joe Schurmann 4-63
Nomograph for a transistor switching circuit ..... D. J. Grover 10-72
Optimized worst case design—
Example 1: The complementary inverter 3-82
Optimized worst case design—
Example 2: NOR-logic circuits 3-85
Optimized worst case design—
Example 3: Transistor-diode logic circuits.... 3-88
Understanding and using the dual-gate MOSFET R. Dawson, R. Ahrons & N. Ditrick 9-36

TUBES

New idea in readouts: a multi-gun CRT 6-23

WIRE & CABLES

Finding impendance mismatching losses ..... David P. Costa 11-52
IR method bonds flexible cables ..... Smedley B. Ruth 4-21
Terminating flat cable by welding ..L. H. Schmid 7-70

Printed in USA
